

Protect Your Business From Crime

CYBERSECURITY

CHECKLIST

Education - prevent rather than recover

Better passwords and multi-factor authentication

Use internal knowledge

Safe and secure wifi connection

Consider a VPN to privatize connections

Backups

Anti-Virus software

Secure physical devices

Keep hardware up to date

Double check that a site is using HTTPS

Update software and firmware

Be safe rather than sorry

Scan external storage devices for viruses

Have a plan - refer to Small Business Administration

Safeguard protected data

Remove adware from devices

Disable bluetooth when not using it

Hire a "white hat" hacker to check systems
